Coincidence of the present

Coincidence of future

Providence of the past

Providence of the present

Providence of the future

Conclusion

Mind and Matter

Mind is logic behind our upbringing and mind controls our sense of

- 1.seeing,
- 2.hearing
- 3.feeling,
- 4.smelling,
- 5.tasting.

with which we are bound to play our part in our human ecosystem to lead a life with concept of coexitence.

The trouble starts when matter comes into play in the form of body being subjected to all impulses and resultant outcome makes the people being polarised and being taken to task.

The role of philosophy and thoughts our peers fore told are being discussed in the most simple and understandable manner with no naming of alma Mater.

Introduction

Co incidence of Providence

Introduction : –

It is an incidence which happens at times and the happening seems to suggest as if the so-called happening has been pre meditated in our dreams or otherwise.

Or for that matter , the situation was visualised to some extent in our previous thought process subconsciously .

The fact that the subconscious mind stores informations like the visuals of persons or objects in subjective manner.

And the display when enacted out of the process seems to us that incidents are time bound or space bound.

While I narrate my instances as incidents in time frame, the situation might be different but the context of characters coexist in the ecosystem in which we live to play a part .

The space travel is such that the time and space are coexisting and the resultant enactment of sequence is bound to happen when we are forced to do or doing the work without premeditations.

The only factor at play is our conscious mind which plays out the subconsciousness of an individual in a place or time or situation.

Coincidence is combination of time and situation which together encompasses the place.

Well what are all the Providence at play in our subconscious mind.

Let us see one by one : –

A friend of mine to whom I often interact is of the view that every thing we do or think or the process of Life cycle perse is infact done by Providence ; in short every action or inaction to stimulus is done away with by Providence which is at play always.

Supposedly, he meant that our actions and counter effects are pre planned in cosmic universe well in advance.

If that be the case what is the role of efforts put into by individuals . The question that arises is that how can one say that he planned and succeeded according.

Is it not his efforts or both Providence and instincts of individuals are in complicit.

It cannot be explicitly explained unless otherwise we can provide some solid evidence to back the implied science.

For example, while we finish the task , the out come determines our success if not despair or delusion sets in , with meshing things up by blaming others.

Finally, it leads to break down of our psychological set up often culminating in anger or anxiety or depression.

The role of Providence is sought-after in the above said case and Providence is being invoked in us as a tool for success with obisance to almighty.

While we pray to almighty for what has happened, we seldom forget that our abilities are limited and time bound.

While we seek the time with our space ,
(psychological time) we can get the solace we need in the form of contentment.

While it hardly possible to lead a life of full contentment in the 200 %consumer world,(as gadgets are playing at free will)the only recourse to life is philosophy rather than psychology.

My friend visited my home and saw a photo (black and white) of me taken when I was barely 10 months ; and my face was captured twice diabolically opposite of my emotions with smile and smirking at break even.

He was astonished to ask one question?

The photo was taken in a shot in a matter of second, and it is absolutely possible that the slightest movements are pictured, photographed and displayed with ease and evolution.

It draws a pertinent answer that the phenomenon of life is mood

swing which complicates and compliments according to the demand of the situation.

Coincidence of past

No one knows for sure how 'the world around us' would evolve and the role that one plays in the given period of time ie LIFE is what matters most to all.

It is often said that 'be in the present' is the way forward for goodness of the individual and the society at large in the long run as every other individual does have a role to play his or her part according to the demand of the 'situation'.

Here what matters most is the situation rather than time as 'time factor' is being discussed at length by one and all to be precious and precise to be successful and all the conundrum associated with them.

Let me put all these as "the inner self" which is the voice one seldom hears as this would make a clarion call unto oneself to be self determined to take the task head on and be with it by pursuing the course of action as demanded at times".

So lead a life as pleasant and peaceful as you can and let the situation play its part and we be the wannabe trying to catch the art of qualification that the 'living' demands.

Coincidence of the present

What is shame all about?

According to one school of thoughts, it is right for certain people at certain times.

The question arises as to whether the how the people in the other side of the spectrum would view it.

The other people are usually weaker and fragile both physically and financially and if both the weakness getting strengthened, the ball would start rolling in the opposite direction.

The typical example is “politics in India ” where in the system is such that people who own the podium would dictate terms to opposite parties to settle the scores and vice versa when the tide start moving in the opposite direction with the passage of time.

So the time is significance rather than the situation and situation would be created for leaders for wielding powers in the form of elections and the best who adopts to sentiments of people are usually the power brokers and people are falling pray to their rhetorical and false promises .

The final truth is Situation is trapped red and blue by TIME.

Coincidence of future

Time is the greatest asset one should treasure. It is the watch word for all the speakers, writers , philosophers, artists, musicians, singers and what not, all and all included.

So the time is situation bound or it is free from situation aswell.

Rather we could call the TIME as implicit, explicit and complicit of the situation.

Providence of the past

Me in Me is always asking and indulging in making Me Mad by thinking about my deeds rather misdeeds and the resultant situation created out it made Me vulnerable and falling pray to the climax created out of the situation and the resultant action of the individuals concerned , in most cases it would be parents, teachers, mentors, managers, owners ,as the cases vary depending upon the players involved.

In this scenario, people often being taught to Praught with situation but the truth is otherwise.

With the situation so created impeded in our brains , the images of the persons often come to our imaginations and play their part as VILLAINS and we poor creatures are found wanting in our patience and time and react within our own self creating all depressions and diseases associated with them.

Is there a way out ?

Providence of the present

Let me split the TIME as follows

Time is one which

1. Teaches,
2. ignites,
3. meanders,
4. eases.

In short, time teaches one to be aware of the situation

It ignites minds about people, environment, situation etc,

It meanders minds to set a strong foot in the decision making process,

4. it eases with time so we as humans are living because of our forgetfulness and by foregoing or forgiving both are divine to be followed .

Providence of the future

It is often said that Me is symbolic which changes it's contour with association as ME being called

Father to son or daughter

Brother to sister or brother

Cousin to brother

Mother to son or daughter

Cousin brother to brother's brother

Uncle, aunty, nephew, niece so on and so forth.

What sets ME to ME apart is

I am made up of Earth being filled with Air and Space being nurtured with Water and Fire .

ME in ME is not MATERIALISTIC .

It means to say that me in me is soul or atma which i can not feel or experience but I could reverberate so much so that it could be felt or assuaged to the seekers of TRUTH namely followers who are seeking divine things from peers and seers.

Western philosophy and eastern philosophy are both to be studied in details and path to freedom is our own way out.

My Life,
My Experience,
My Feelings,
My Clairvoyance,
My Telepathy,
My Behaviour,
My Societal understanding,
My Seers
My Father, My Mother, My Teachers, My Mentors, My Gurus,
From
Me Being Mine.

Selvaraj r

In last 10 years, TEN major reasons for degradation of financial situation of a family:

1. Everyone in family owns smartphone.
2. Vacations under social pressure.
3. Buying a car & gadgets as a status symbol.
4. Avoiding home made food and unnecessarily eating out on weekends.
5. Brand conscious for salons, parlours and clothes. Spoiled lifestyle increasing medical expenses.
6. Trying to make Birthday and anniversary special by spending more money rather than time together.
7. Grand weddings and family functions.
8. Commercialization of Hospitals, Schools and tuitions.. education...etc.
9. Spending what you haven't yet earned...by loans and credit cards...
10. Spending tons of money on interiors of house & office and thereby increasing the Maintenance cost....

We are copying others' lifestyle without understanding our own needs and income. If this does not get curtailed, it will lead to lots

more stress and anxiety with passing years (as habits don't change).

– *Brilliant message*

I felt it to be worth sharing
